Box Control APP

Highend audio control via smartphone

Box Control APP is a special development for full control of Box Design network audio players, that takes advantage of our own new **NetAPI interface**. By a touch of your finger, you can play back music from **media servers, Internet radio**, connected **USB storage** and i**Pods.**

Additionally **Box Control APP** will be able to operate all IR-controlled Box Design components and even 3rd party devices (like TV …), when using our forthcoming **Remote Box**. (Available as an option in near future - product information will follow)

Why a proprietary Control APP?

3rd party controls did not meet our requirements in speed, convenience and reliability, so we decided to introduce our own. As a first step we developed a **proprietary NetAPI interface**, that offers a lot of new possibilities. The first applicationthat made possible with this new interface is our new **Box Control APP**!

Box Control APP is compatible with **Stream Box DS net (available now!)** and all future products, like **Stream Box DS plus, Stream Box DSA and Stream Box RS**.

⇒ **All functions**
Select your favourite music from your media server, Internet radio and USB inputs.

⇒ **Simplicity**
Simple to understand with no restrictions in functionality.

⇒ **Speed**
Ultra-fast access to your favourite music: Start, select, play!

⇒ **Elegancy**
Plain and cheerful user interface for real music lovers.

⇒ **Smartphone = Smartphone**
Available for Apple's iOS and Google's Android

free download!

>>> Owners of Stream Box DS <<<

that also want to benefit from new Box Control APP, have the opportunity to upgrade to **Stream Box DS net** *(please see „Upgrade" information)*

Total cost of upgrade including return shipment is only € 100,00 (incl. VAT), which is the difference of retail prices between Stream Box DS and Stream Box DS net, with no extra charge!!!
