

Dock Box S Digital

Highend Apple-Dock with internal D/A conversion

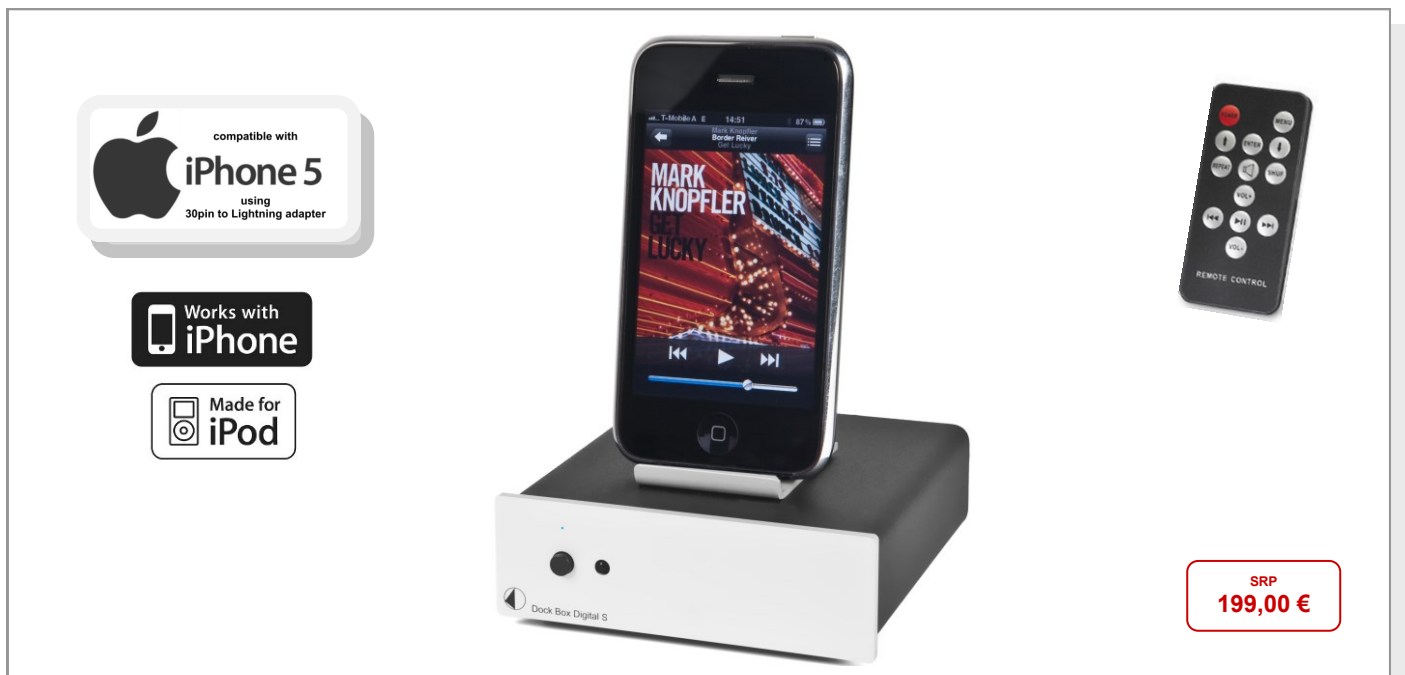

- Pure digital audio transmission
- 24bit/192kHz D/A converter
- Additional SPDIF output (RCA)
- APPLE certified
- Audio playback from iPod, iPhone, iPad
- iPod/iPhone/iPad charging capability
- S-Video output
- Power switch on faceplate (also switches charging)
- Power button on remote (= standby with charging)
- Full-functional IR remote with volume control

INPUT: 30-pin connector
OUTPUT: Analogue/(RCA with 0,775mV) & S/PDIF (RCA-digital) in 32/44,1/48 kHz

AUDIOPROCESSOR XMOS (400 Mhz)
D/A-CONVERTER: Cirrus Logic (24bit/192kHz)
DYNAMIC RANGE: 105dB
VIDEO PORT: S-Video

FINISH: Front black, or silber
POWER SUPPLY. 9V/2000mA DC

DIMENSIONS: 103 x 36 x 109 mm (BxHxT)
WEIGHT: 585 g without power supply

Get the best audio performance from iPod & Co!

Dock Box S Digital uses digital audio signal from Apple devices to avoid signal degradation inherent to the analogue outputs. All signals are directly transferred to **24bit/192kHz** highend D/A converters by **Cirrus Logic**. Additionally there is a SPDIF digital output (RCA), that can connect to outboard D/A converters or digital inputs of home cinema processors.

Dock Box S Digital is certified by APPLE and can be used **with all equipment that uses 30-pin connection**. When using iPhone5, you will need Lightning adaptor. Due to implementation of **XMOS audio processors** ultra-low jitter levels are guaranteed. The massive full-metal housing with its new S-Design looks classy and protects against unwanted interference.

The package does also include a **full-functional IR remote**, that makes it easy to navigate in menus of iPod; iPhone, iPad and adjust volume level
