

Dock Box S Fi

Audiophile dockingstation

- Compatible with all current models: iPod, iPhone, iPad
- **Fi version with constant volume level** - ideal when combined with existing hifi audio system
- Perfekt signal transfer from 30-pin analogue-out
- Full metal housing prevents interference
- RCA stereo output
- S-video output for on-screen monitoring
- USB port for data transfer from PC/Mac
- On/Off switch on front
- Remote control included
- Faceplates silver or black

Tech Data

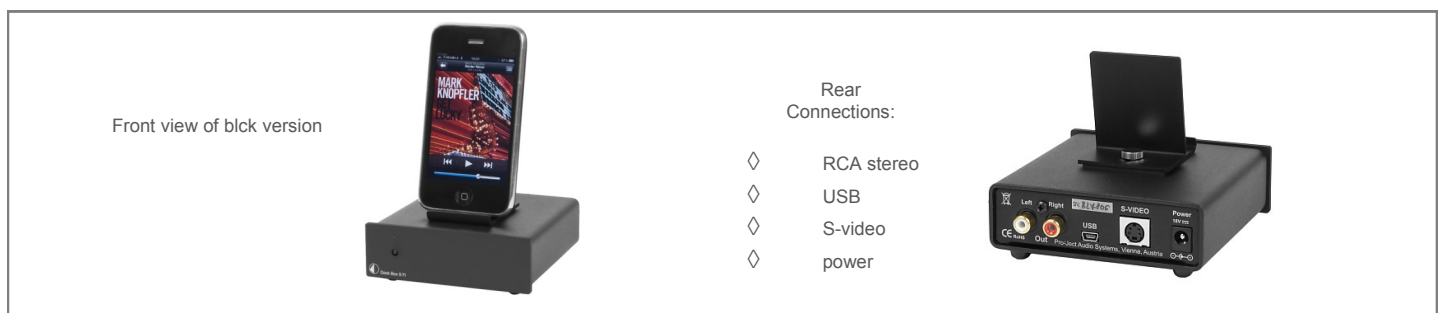

Frequency response	20Hz - 20kHz
High level audio output	1 pair RCA connectors
Output impedance	15 ohms
Output voltage	0,300Veff
USB port	digital, serial protocol USB 1.1 (Windows® and MacOS®)
Video output	S-video
Power supply	18V/500mDC, 220 - 240V, 50Hz
Power consumption	16V/200mA DC max.. depends on battery status
Remote battery	1 x CR2025 3V
Dimension W x H x D (D incl sockets)	103 x 36 x 103 (109)mm - Height excludes iPod® or iPhone®
Weight	585g without power supply

Dock Box S Fi: audiophile dockingstation for Apple music players!

Dock Box S Fi makes your iPod part of your audiophile hifi system at home. Dock Box acts like a perfect buffer amp for the iPod and therefore lowers the distortion level significantly.

After passing an initial amplifier section, the signal is transferred to the hi-fi system with an impedance lower than 15 ohms. This guarantees trouble-free signal transmission with ultra-flat frequency response and offers the best, most cost-effective way to build an audio system around an iPod.
